

# Kedu Sling-tying Instructions

1

Lay the Kedu Sling over your hips and hold it up between your legs.

2

Place your baby on the side of your hips, bend a little bit forward and carefully move it unto your back.

3

Raise the sling over the neck of your child and pull the ends tightly over your chest.

4

Twist the ends closely around each other and hide them under the sling.

5

Roll up the lower part of the sling and pull the ends towards your belly.

6

Once again, twist the ends closely around each other and hide them under the lower edge of the sling.
